Title (description) Modify shell startup files in the VATC to set the ECS environment			
Documents Affected  None	Source Nos (RID, NCR, Action Item, GSFC CCR, etc.) or Tech Reference "Managing ECS Project Environment Data" - paper available from R Magill or H Ausden		
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>			
Problem 1. There is no single controlled approach to setting the ECS system environment (e.g., variables such as ECS_HOME and SYBASE). This leads to integration problems because different groups have different values and different ways of setting the common environment. 2. The approach that was recently tested in 4P in the mini-DAAC needs to be propagated to the VATC.			
Proposed Solution For each user (per list previously supplied for the mini-DAAC), modify the shell startup files (.cshrc, .kshrc, ...) to source the appropriate EcSysCfgEnv* script to set the environment.
